

Engage Multiple Lessons

If you engage a lesson in Student Paced mode or Student Practice mode, you can engage more than one lesson at a time. Engaging multiple lessons is especially helpful when you would like to use multiple versions of a test.

To engage multiple lessons, follow these directions:

1. Click the **Engage > Lessons and Assessments** tab.
2. Select the lessons from the lesson side (left or top window) of the screen you want to engage. A checkmark will appear in the box in front of the lessons you selected. You will notice “Engaging Multiple Items” appears in the **Title** box in the **Engage Options** group.

3. Click **Assessment Setup** in the **Engage Options** group. A list of delivery modes appears.
4. Select Student Paced from the list of delivery modes. *Please refer to the Student Paced Mode section for more information on Student Paced mode.*

5. Click **Engage** in the **Assessment** group. The Test Version window appears.

6. Students will enter the alpha character on their response pads that correspond to the lesson they wish to take. *For example, in Figure165, if a student wishes to take Quiz 1, he or she will push A on their response pad. If a student wishes to take Quiz 2, he or she will push B on their response pad.*
