

## Engage Student Practice Mode (IR Only)

The Student Practice mode operates in much the same way as the Student Paced mode. However, the intent of the Practice mode is for students to review and get familiar with course material in a challenging way.

Therefore, in the Student Practice mode, only a correctly answered question moves the student onto the next unanswered question. If a student answers a question incorrectly, their corresponding on-screen number flashes blue until they answer that question correctly. When they do select the correct answer, their corresponding on-screen pad number changes to blue. Then they progress to the next unanswered question.

For grading purposes in the Report Tab the student's first answer is what is scored.

### Engage Student Practice Mode

1. Click the ***Engage > Lessons and Assessments*** tab.
2. **Select the lesson** you want to engage by clicking in the check box before the lesson name.
3. Type a **title**, choose a **session type** and **select a class** in the Engage Options group

Title: 2004 Gr 4 Science Pt 1	Advanced	Teacher Led
Type: Class Participation	Assessment Setup	Student Paced
Class: LMK Training		Student Practice

Engage Options

4. Click **Assessment Setup** in the Engage Options group. A list of delivery options appears.
5. Select **Student Practice** from the list of delivery modes.

6. Click **Engage** in the Assessment group. The CPS Feedback window appears.
7. Click **Start** to begin the response cycle.
8. Click **End** to end the response cycle.
9. Click **Yes** to save the data and end the session.
